REPORTED WEEVIL IN WHEAT CAUSES A DECLINE

After a Firm Opening and Slight Rise Longs Commence to Realize Profits and Abundant Offerings Start a Downward Ma ket-Corn Goes Lower and Oats Follow Suit -Provisions Heavy in Anticipating Large Supply

from New York yesterday was fully confirmed this morning. Commission houses with New York connections said the amount taken there by millers vesterday was not short of 1,250,000 bushels, and there was further in-quiry here this morning from the same bources. As a result the market started firm at 14 cont over yesterday's closing price for May and July, but the longs apparently received that as a formal opportunity to realize a little profit, and theirs was the selling which caused the subsequent decline. A report was circulated that a cargo of wheat in a vessel here had developed weevil and was being unloaded in consequence. It turned out that the cargo in question had received some damage from the weather through imperfectly battened hatches and about 600 bushels becoming heated, developed weevil and was taken out to prevent the weevil spreading. It had the effect, however, of turning sentiment from strength to weakness, and caused, along with the previous realizing—by the bulls, a decline in May wheat from 5894a5876 to 5836 cents. The receipts here were thirty-nine cars, against 263 cars a year ago. Minneapolis and Duluth reported 337 cars, compared with 230 cars last year. Atlantic export cl-arances yesterday were light, but for the week, from both coasts. Bradstreet's reported clearances of wheat and flour at 3,258,050 bushels, against 2,851,000 bushels the week before and 2,886,000 bushels the corresponding week of last year. The weevil discovered in the cargo of wheat was made the most of by the bears. The market guled weak to the end, and closed at the lowest of the day's range, 58% cents for May. Liquidation of long corn was the feature of the trading in that article. Schwartz and others who had at one time felt that corn was low enough, have evidently changed their minds, in view of the liberal receipts on top were \$50 cars today, and estimates for Monday are \$74 cars. Business was dull for half an hour, but at the end of that time Bartlett. Frazier and one or two others increased their offerings, and pressed them with redoubled vigor at the same time. May opened at \$735 cents, or at the same price \$1.00 cents of \$1.00 cents cents, or at the same price it closed yesterday. It was easy at that, however, and soon began to yield. About half an hour from the close it was down to 36% cents. There was a recovery to 36% cents, and that was the closing quota

WHEAT PANIO IN FRISCO.

San Francisco, Cal. March 17.—The panis in wheat which sent up the quotations yester day from \$1 10 to \$1 10 5 for May delivery appeared this morning to have entirely suspended. The highest offer on the board this morning was \$1 10, with nobody to buy at that price. The disinclination to trade May, how. ever, was due in a measure to the fact that business in many of the offices is suspended owing to the celebration of St. Patrick's day. which took place today at the midwinter fair grounds. At the close of the call yesterda the directors of the exchange reduced the marginal price of May from \$1 10 to \$1 05. I W. McGlauflin & Co., the chief operators in yesterday's deal, have made a statement re-fusing to be governed by the action of the directors of the call board as applied to their contracts of yesterday, and repudiating their contracts. The firm has, however, deposited with the produce exchange certified checks covering the amount of their transactions. The directors of the exchange refused to receive McGlauffin & Co,'s check, unts to \$100,000. It is stated that the rules will compel McGlauffin & Co. to make good their contracts on Monday nextor be sold out,

BIG AUCTION IN DRY GOODS.

New York, March 17.-In dry goods, as usual on Saturday, and St. Patrick's day being usual on Saturday, and St. Parines stay being observed, the demand of jobbers was more quiet because of the distraction. This gave a fair opportunity for clearing up the week's business, which was improved. The sales, however, will foot up large. In conton circles there was a fair demand early in the day for a miscellaneous assortment of goods, although a large business was done through wire and wall wash and the week. orders. The business for the week showed large figures, and the close shows a much better tone in all departments. The coming week will be an attractive one in auc-tion circles. Townsend & Montaut will sell 6,50) pieces of dress goods and 4,000 pieces of silks. Other houses will sell at auction 3,75 pieces of dress silks and 8,00 carrons of all silk ribbons. On Monday, March 19, 1894, H. B. & S. K. Knight will make the prices of fruit of the loom, 4x4, 7% cents and 7x86% cents net sixty days, subject to change with.

A WELL-SPRING OF JOY. How the Roy Slept with His Pa and the

Story Pa Told. "A kid in the house may be a well spring of joy," said the married man "But there are times when I am forced to take issue with the author of the sentiment.

"For instance, I've got a boy who in sists on sleeping in his mother's room He won't come near me after it is time to go to bed, and for six months I have not been able to coax him into my room after dark. His crib is beside his mother's bed, and there he sticks night after night. I like to have the little fellow sleep with me occasionally, but he ignores my request.

"The other night I was detained at the office until late in the evening and came home dead tired. I haven't beer so thoroughly fagged out in five years and it was all that I could do to pull my clothes off before I tumbled into bed I had just struck the pillow when I heard the patter of little bare feet it the hall. Then my door opened and that blessed kid came in and an that night. He climbed into bed, snug gled down close to me and demanded that I tell him about the three bears I mumbled off something or other and he kicked me in the ribs and said that ! should 'tell it nice.' His fondness for the great big papa bear, the middie-sized mamma bear and the tiny baby bear that night was flendish. I had to lay there and tell that story to him at least tifteen times. If I dropped to sleep while relating the adventures of the bruins he found a way to wake ne up, and if I stopped talking he sel up a yell that you could hear a block

For six months he refused to sleep and three thousand or four thousand with me, but on the night on which ? feet lower than Mount Washington. cas wearier than I ever was before you couldn't keep him out of my bed with a club. Such experiences a those make married men sigh regret fally for the joys of bachelorhood.

Quotations a

Stocks.

CHICAGO, March 17.—Weevil in a car load of wheat loaded in the river was the warrey of the bears today. Chinch bugs in the winter wheat fields, replied the bulls. The weevil was at home and was felt more than the bug bites on the growing wheat, and consequently prices dropped. Compared with vesterday's closing prices, May wheat is % cent lower, Corn, outs and provisions were even weaker than wheat. Corn declined % cent, outs % cent and pork 20 cents per barrel.

The heavy cash business in wheat reported from New York yesterday was fully confirmed this moraling. Commission houses with New York connections said the amount taken. ing contracts, depressed the market for the sell was not however, at all pronounced, and stocks moved independent of one another. advances being made in one pool, while de clines occurred in another. The market opened strong and closel generally weak, there being periods of strength and weakness between times. A majority of the active list shows a decline from vesterday's closing.

SPECIE MOVEMENTS.

MOVED IN THE ICE AGE. Huge Bowlders Carried All the Way from Canada to Kentucky.

Prof. A. R. Wallace states in the Fortnightly Review that an immense area of the northeastern states extending south to New York and then westward in an irregular line to Cincinnati and St. Louis is almost wholly covered with a deposit of drift material, in which rocks of various sizes are imbedded, while other rocks, often of enormous size, lie upon the surface. These blocks have been carefully studied by the American geologists, and they present us with some very interesting facts. Not only are the distances from which they have been transported very great, but in very many cases they are found at greater elevation than the place from which they must have come. Prof. G. F. Wright found an enormous accumulation of bowlders on a sandstone plateau in Monroe county, Pa. Many of these bowlders were granite, and manufacturers of Brass and Steel Stamps, and Agents for the Victor and Waverly Bicycles. Adirondack mountains, two hundred miles north, or from the Canadian highlands, still further away. This accumulation of bowlders was seventy or eighty feet high, and it extended many miles, descending into a deep valley one thousand feet below the plateau in a nearly continuous line, forming part of the southern moraine of the great American ice sheet.

On the Kentucky hills, about twelve miles south of Cincinnati, conglomerate bowlders containing pebbles of red jasper can be traced to a limited outcrop of the same rock in Canada to the north of Lake Huron, more than stx hundred miles distant, and similar bowlders have been found at intervals over the whole intervening country. In both these cases the blocks must have passed over intervening valleys and hills, the latter as high or nearly as high as the source whence the rocks were derived. Even more remarkable are numerous bowlders of Helderberg limestone on the summit of the Blue Ridge in Pennsylvania, which must have been brought from ledges at least five hundred feet lower than the places upon which they now lie. The Blue nounced that he would sleep with me | Ridge itself shows remarkable signs of giacial abrasion in a well-defined shoulder marking the southern limit of the ice (as indicated also by heaps of drift and erratics), so that Mg. Wright concludes that several hundred feet of the ridge have been worn away by the ice. The crowning example of bowlder transportation is, how-ever, afforded by the blocks of light gray gneiss discovered by Prof. Hitchcock on the summit of Mount Washington, over six thousand feet above sea level, and identified with Bethlehem gneiss, whose nearest crop is in Jeffer
